

## **NEVADA STATE BOARD OF PHARMACY**

985 Damonte Ranch Parkway, Suite 206 - Reno, NV 89521 - (775) 850-1440

### **Veterinary Supplier Facility Inspection – Instructions sheet and form**

(Revised 1/2022)

The NVBOP's established self-assessment inspection process provides management the opportunity to review the standards by which the board inspects your operation. The process recognizes you as the responsible person to implement and review policies and procedures necessary to provide a quality standard of pharmaceutical services.

**Please have the self-assessment form completed and available for review by the first day of the month listed on your inspection notice. An inspector will review the form with you and inspect your facility during the month listed on your inspection notice.**

**To minimize any disruption to your facility during the inspection process please have the following available:**

1. Completed inspection form along with prior year inspection form
2. A listing of all suppliers of veterinary prescription drugs and veterinary non-prescription drugs/biologicals
3. Invoices or other documents provided by the supplier concerning the purchase of veterinary drugs
4. Prescriptions from veterinarians for veterinary prescription drugs sold (if applicable)
