

NEVADA PRESCRIPTION MONITORING PROGRAM (PMP)

Effective January 1, 2018, a practitioner, other than a veterinarian, shall, before issuing an initial prescription for a controlled substance listed in schedule II, III or IV, or an opioid listed in schedule V, and at least once every 90 days thereafter for the duration of the course of treatment using the controlled substance, obtain a patient utilization report (patient report) regarding the patient from the PMP (NRS 639.23507). The practitioner shall:

- (a) Review the patient report from the PMP to assess whether the prescription for the controlled substance is medically necessary; and
- (b) Determine whether the patient has been issued another prescription for the same controlled substance that provides for ongoing treatment using the controlled substance. If the practitioner determines from the patient report or from any other source that the patient has been issued such a prescription, the practitioner shall not prescribe the controlled substance.

A practitioner or dispenser may assign a delegate to assist them in obtaining patient reports from the PMP. The delegate will have to register for their own PMP account following the instructions below.
